Santander Sterling Bond Income Portfolio (the "Fund")

A sub-fund of Santander Managed Investments OEIC 2 R Income Share Class (ISIN: GB00B634DP67). This Fund is managed by Santander Asset Management UK Limited. This Fund is authorised in the UK and regulated by the Financial Conduct Authority.

Objectives and investment policy

The Fund's objective is to provide an income. It aims to provide a greater annual income than the composite Target Benchmark 90% Markit iBoxx Sterling Corporates Index TR, 10% FTSE Actuaries UK Conventional Gilts All Stocks Index TR. No level of income is guaranteed.

The Fund is actively managed (discretion is used to select assets) by the Sub-Investment Manager (Sub-IM) and invests at least 95% in bonds. At least 70% will be in bonds issued by companies and other non-sovereign entities, and up to 30% in government bonds. The Fund invests globally in developed markets, but at least 70% of bond investment must be denominated in Sterling, and at least 95% denominated in or hedged to Sterling. The Fund invests in investment grade bonds. It may also invest in sub-investment grade bonds (up to 10%), and unrated bonds (the Sub-IM determines if they are equal to investment grade or sub-investment grade, up to 5%). Up to 30% can be in non-standard bonds: e.g. which can make payments before expected, or asset/mortgage backed securities whose return is from debt (e.g. asset/mortgage backed securities up to 5%) and in index linked bonds (up to 20% although not a key part of the Fund's investment strategy). Up to 5% can be in cash, cash like, or other money market instruments. Derivatives will be used regularly for Efficient Portfolio Management (including hedging) to either reduce risk, reduce cost, or to generate additional capital or income without materially affecting the Fund's risk profile.

The Sub-IM's investment strategy seeks to provide the annual income by selecting bonds which outperform the Target Benchmark on a total return basis. It may invest in bonds which provide regular interest payments to facilitate such payments, and look for opportunities where it believes bonds have been mispriced. The Sub-IM considers credit risk (potential risk that issuers don't make payments), and how changing interest rates may impact a bond's value. For company bonds the Sub-IM assesses: industry attractiveness, competitive position, management quality and financial position. For government bonds it assesses economic and socio-political factors to determine payment obligation risk. The Sub-IM uses risk measures which inform its investment process, some (e.g. issuer credit rating and bond duration) reference an index in the Target Benchmark. The Fund is also typically managed with a tracking error (deviation from the Target Benchmark) of up to 1.5%, which may be higher (e.g. in volatile market conditions) if consistent with the investment strategy. Whilst the Sub-IM doesn't have to invest in the same assets or amounts and may hold significantly fewer assets than the Target Benchmark, some will reflect its constituents. The Target Benchmark has been selected as it is representative of the Fund's bond investment. The Authorised Corporate Director (ACD) considers Fund performance against the Target Benchmark when determining remuneration for its fund managers who select and monitor the Sub-IM.

You can buy and sell shares in the Fund on any business day. Income arising from your investment will be paid to you shortly after the 15th of each month.

Recommendation: Investment in the Fund should be regarded as a long-term investment. This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk ← → Typically higher rewards, higher risk

The lowest risk and reward indicator does not mean risk free. The Fund is rated 4 due to the nature of the assets it invests in. The material risks listed below are not adequately captured in the indicator above.

Bond Risk: Increases in inflation and interest rates, reduction in issuer creditworthiness and other risks related to bonds can reduce their value.

Capital Erosion Risk: Fees are taken from the Fund's capital. This helps the Fund generate income, but could result in capital erosion or reduce the potential for capital growth.

Counterparty Risk: A default by a counterparty (including derivative counterparties and any providing a service, e.g. safekeeping of assets) may result in a reduction in the value of the Fund.

Country Risk: Investing all or mostly in a single country or region (UK) can be riskier than a fund that invests more broadly.

Derivatives Risk: Derivatives are highly sensitive to price movements. Some derivatives may generate additional volatility in the value of the Fund and may result in the Fund being leveraged.

Income Risk: There is a risk that the income paid by the Fund is less than the level detailed in the Fund Objective.

Liquidity Risk: It may be difficult to sell some investments, or to sell them without making a loss which may reduce the value of your investment.

The value of your investment and any income is not guaranteed and you may get back less than the original amount you invested. The Fund Prospectus section "Risk Factors" has more information.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.64%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

The Ongoing Charge Figure (OCF) is based on expenses for the year ending 15 September 2025. This figure may vary from year to year. Transaction costs, which are not included in the calculation of the OCF but are incurred by the Fund when buying or selling investments, may have an impact on performance and are paid from the assets of the Fund.

Our current policy is to charge all fees and expenses to the capital of the Fund, and not the income.

More information about charges can be found in the Fund Prospectus section "Fees and Expenses" and Appendix 1.
